# FrontEnd (UX) Developer – Case Study

Download and extract the 'fe_ux_case_study.zip' file.

Find the static HTML template named "**template.html**" and its accompanying documents called "**template_files**".

Use **VUE3** (CDN) to create dynamic data manipulation for each widget listed below on the page. Create each widget as a "Component"

Get the data from the *.json files that are found in the '**jsons**' folder.
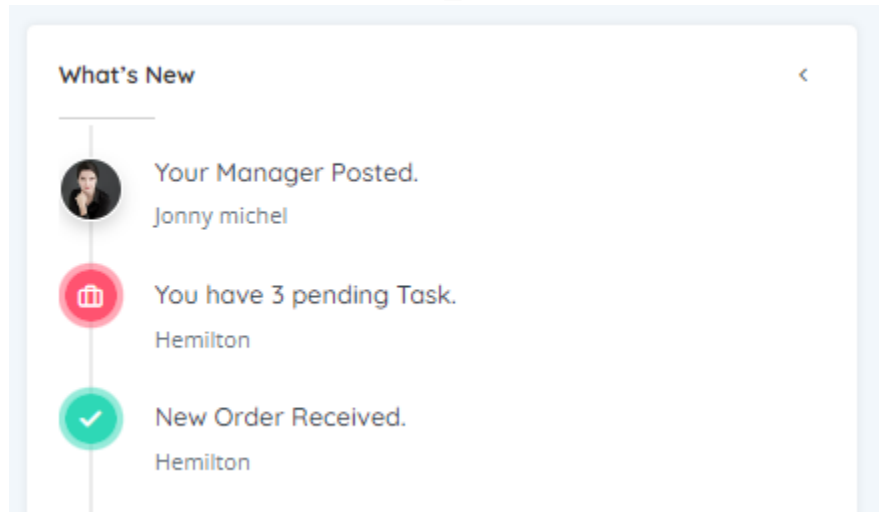

Widget 1: Summary

- Use data from **summary.json**

Widget 2: Project Progress Summary

- Use data from "**Project_Progress_Summary.json**"

Widget 3: What's New

- Use data from "**Whats_New.json**"

Widget 4: Latest Activity

- Use data from "**Latest_Activity.json**"

-

Widget 5: New Products

- Use data from "**New_Products.json**"

New Products
